

CHANGING PRECIPITATION

Expect different precipitation patterns, with wetter springs and winters, and drier summers.

LANDSCAPING

Stop water from getting in by sloping landscaping, eaves, and downspouts away from your home.

KEEP IT DRY

Install a backwater valve to protect your home from a sewer line back-up and make sure your sump pump is working.

KEEP IT SAFE

For worst case scenarios, keep valuables in water proof containers and make sure that your insurance is up to date.
